Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. Claims 1 – 50 are pending in this Office action.

Election/Restrictions

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

The species are independent or distinct as follow:

Species I: Claims 1 – 12, drawn to collecting experimental data on a computer system, comprising: initializing a container, storing configuration information and calculating and storing a plurality of container summary data in the container database.

Species II: Claims 13 – 26, drawn to storing experimental data comprising: collecting a plurality of image data and a plurality of feature data, creating a first database, creating a first entry in the first database linking the first database to a second database and creating a plurality of second entries in the first database linking the first database to a plurality of third database and the data is organized in a plurality of tables.

Species III: Claims 27 – 35, drawn to spooling experimental data comprising: copying a second database from an analysis instrument to a shared database, copying a plurality of third database from an analysis instrument to a shared database file server and updating the location of the second database.

Species IV: Claims 36 – 39, drawn to managing multiple database files in a database, comprising: initializing a hierarchical storage manager with a pre-determined storage removal policy, copying and storing the database files.

Art Unit: 2162

Species V: Claims 40 – 48, drawn to presenting experimental data from a plurality of database, comprising: displaying a list, receiving a first selection input, obtaining a second database for the first container, receiving a second selection and creating a graphical display.

Species VI: Claim 49, drawn to a data storage system, comprising: a shared database on a local area network, a hierarchical storage management system, a pass-through database and an application programming interface.

Species VII: Claim 50, drawn to collecting and managing experimental data, comprising: collecting a plurality of image data and feature data, storing and spooling image data and feature data and managing multiple database files in a database.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR

Art Unit: 2162

1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103 (a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship

Art Unit: 2162

must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
